INTRODUCTION

1918

This is the ninth issue of the Richmond and Martinez Directory. Great care has been used in gathering the data and compiling it and the publishers have great confidence in the completeness and accuracy of this directory.

The directory has passed through the same period of evolution as the cities and the Richmond and Martinez of today compares with the small towns of 1909 as the directory of today compares with the small book published nine years ago. The Richmond and Martinez Directory, like the cities it represents, has developed and expanded as it grew and is now regarded as one of the most useful and accurate publications of its kind. The single column page which is used in all small directories, has been abandoned this year and the up-to-date double column page has taken its place, in order to condense the information and make it more accessible to the people and diminish the number of pages to be turned, in looking for a name.

The directory is the standard work of reference of all the people, in which they are all represented and interested. It is the most permanent history of the people and their institutions. No other work shows so clearly the changes which are continually taking place.

There are three departments to the directory.

The largest is the general list of names and tells all about the people.

It tells all about their institutions and corporations.

The street and householder's guide lists all of the streets and avenues alphabetically and the street numbers in order of rotation and after each street number appears the name of the person residing at that address.

The classified lists in the last portion of the book is a catalogue—the most complete and accurate that can be obtained and shows not only everything that is bought, sold or manufactured in the cities, but every kind of service that is offered.

The directory is a useful and valuable semi-public utility, absolutely necessary to the commercial, professional, social, political, educational, and religious progress of the day.

The importance of the directory has increased with the rapid development of the telephone. It is mandatory that the directory be used if the most intelligent use is to be made of the telephone.

POPULATION.

The directory estimate of the population has been proven so correct that in most of the cities of the United States it is the accepted authority and takes preference over the government census. For the Census Bureau arrives at its guess of the population by an arbitrary formula, while the directory makes the estimate from the actual statistics gathered at the time.

The population of Richmond, based upon the number of names appearing in the Richmond section, is 23,529 which is an increase of more than 1000 over last year. The population of Martinez is 4,290, which is a very material increase above last year.

R. L. POLK & CO.'S
RICHMOND STREET DIRECTORY
OF HOUSEHOLDERS
1918

In the following list, the Streets, Avenues, etc., are arranged in alphabetical order without regard to location. The number of each residence building on the street is given in numerical order, and opposite the number is printed the name of the householder or householders. To find the occupation of householder, refer to the alphabetical list of names.

Note: The territory covered by the directory of Householders includes that of Richmond Proper, and that portion of Pullman where the numbering on the street is complete. Houses on the sparsely settled streets, bearing no numbers are not noted.

A recent ordinance passed by the City Council has changed a number of the Streets. Streets and portions of streets that may have been changed are noted by a * (Star) and the proper Cross reference has been made. Reference is shown as to the former name of the street, as well as to the new name.

RICHMOND STREET GUIDE
1918

Including Its Adjacent Districts of East Richmond, North Richmond, Point Richmond, Pullman, San Pablo, Rheem, Stege and El Cerrito (Rust).

SYSTEM OF NUMBERING.

All the numbered streets that run north and south begin with Number one at the line of the Santa Fe Railway (which runs east and west) and number each way north and south from this point. All streets running south from the Santa Fe tracks are to be designated with the prefix South. Those running north to be designated with no prefix; for example: Number 26 First Street, south of the Santa Fe tracks, would be designated 26 South First, and the same number North of the Santa Fe tracks would be designated as 26 First Street (not using the prefix North).

All the named streets and avenues that run East and West begin with Number 1 at First Street and number each way; East and West, from that point, for example: 26 Barrett Avenue east of First Street is designated as 26 Barrett Avenue (not using the prefix East), 26 Barrett Avenue west of First Street would be known as 26 West Barrett Ave.

The same system is carried out at Point Richmond. The Santa Fe Railway tracks running North and South there being the dividing line for all streets crossing it. The prefix West to be used on all streets running west from this point, and no prefix to be used on streets running East from this point.

Note: The figures in ( ) denote the distance in block numbers that the street extends; the letter preceding the figures denotes the direction from the zero point; the letter preceding the (N 500) determines this street is 5 blocks north of Santa Fe tracks, which is the zero point.
